FEATURED SECTIONS

6

Nowadays, the jobs that used to be not so popular are in high demand. This review explains which specialists are now in special demand and what salary you can expect working according to your degree.

16

The freelance market in Russia is gaining traction and is expected to grow steadily in the next 5 years. Researches show that the key fields that are going to use freelance work are design, multimedia, IT, finance.

22

The Republic of Tatarstan has great scientific and educational potential and is well-known far beyond the country borders. About 150,000 students from over 120 countries attend its 44 universities.

106

The next part of our guide about foreign students' registration at the place of their residence. How to get registered after entering a Kazan university and what to do in case anything goes wrong, explained by KNRTU and KSUAE staff members.

108

Tatarstan has the same regulations as the entire Russia. For migration registration, international students are given seven working days from the date of crossing the border.

152

English-speaking students master the Russian language remarkably faster and more effectively, making few mistakes. The students from Arabic countries have the hardest time learning Russian.

Dear friends!

We have done our best to make our magazine interesting and useful, but we can still improve it together! If you want to share your experience and plans for the future or give your feedback, please contact us at [✉ kleshnina.es@hedclub.com](mailto:kleshnina.es@hedclub.com).

The Laboratory of MIPT

CHOOSING THE PROFESSION

While choosing the study field at university, some have already decided on a future profession, others are still soul-searching. In any case, everyone strives for self-fulfillment as well as a neat salary.

Nowadays, the jobs that used to be not so popular are in high demand, such as IT and HR specialists, recruiters, creative designers, coaches, analysts. Also, the employers always welcome graduates from medical and pedagogical faculties, as well as engineers. It does not have to be a strictly

office job, either—the freelance market in various fields is gaining traction.

This review explains which specialists are now in special demand and what salary you can expect working according to your degree.

IT INDUSTRY

New applications, services, programs—all this is so popular now that the IT industry remains steadily at the top of employment ratings. This sphere includes everything related to programming, robotic engineering, nanotechnologies and quick data transfer.

If you are good at mathematics and analytics, ready to study not only programming language but technical English as well, you are most likely to succeed in this sphere. The demand for skilled IT specialists is growing fast, the same can be said about their salary.

WHAT DO YOU WANT TO BECOME?

- Programmer
- System architect
- Software developer
- C++ specialist
- Cybersecurity specialist
- Web engineer
- System engineer
- System administrator
- Data analyst
- Internet marketer
- System analyst
- SRE engineer (monitoring engineer)
- Web platform developer
- Tester

WHAT SALARY CAN YOU EXPECT?

By specialization (average, RUB)	
Management	145,000
Development	120,000
Analytics	100,000
Design	90,000
Programming	87,000
Marketing	87,000
Testing	85,000
HR	70,000
Content	70,000
Sales	70,000
Support	55,000

By region (average, RUB)	
Moscow	150,000
St.Petersburg	130,000
Nizhny Novgorod	108,000
Samara	90,000
Yekaterinburg	90,000
Volgograd	90,000
Novosibirsk	90,000
Ufa	85,000
Perm	80,000
Kazan	80,000
Krasnodar	80,000
Rostov-on-Don	76,000
Omsk	70,000
Krasnoyarsk	68,000
Chelyabinsk	66,000

POPULAR IT PROFESSIONS

SYSTEM / IT ADMINISTRATOR

Makes sure hardware and software function correctly and the data is secure. In general, a system administrator is the one who office workers call for help if anything computer-related goes wrong. This specialist explains the risks and detects the source of a threat in case of a suspicious e-mail or if a strange website is opened.

IT specialists are needed at offices, libraries, banks, private and state-owned companies—anywhere where several people work on computers or laptops. The salary depends on the company level, **40,000—50,000 RUB** on average.

WEBMASTER AND WEB PROGRAMMER

Develops the structure and logic of new websites and provides tech support for the existing ones, for major companies or private persons. Programming language and graphic editor skills are required.

Usually, a team of developers creates a complete website. Smaller tasks are completed by one person. By doing tech support for an active website you can earn **30,000—40,000 RUB** on average, for creating a new one you can get paid up to **120,000 RUB**.

DATABASE ADMINISTRATOR

This specialist projects the database, develops technical requirements for it and is responsible for its effective use and support. Apart from that, the administrator manages users' accounts and protects them from unauthorized access. Good technical English skills are optional but preferable.

All major companies have databases of their own: from chain stores to banks and state structures. This profession is ranked among top 50 most in-demand professions, per Labor Ministry of Russia. The average salary is **20,000—50,000 RUB**, depending on the company and workload.

GAME DEVELOPER

Develops software for video games. This specialist has a rather broad range of skills: he or she single-handedly creates the program code of the game, manages its visualization and design.

You can choose between working at major companies that develop popular games or creating simple games on your own. The average salary of a game developer at a company is **50,000 RUB**. A custom project can bring you **100,000—130,000 RUB**.

TESTER

Looks for possible errors in the functionality of a product or a program with the help of a specially created algorithm. Simulates various cases that may appear during the use of the test subject, so that developers could correct the detected errors.

This job is available at tech departments of major corporations, banks or IT companies that do project work. This IT specialist's salary depends on the test subject and the kind of company. On average, a tester earns **from 50,000 to 100,000 RUB**.

SOFTWARE ANALYST

Organizes programmers' work, makes it easier and more effective, is responsible for choosing the development methodology, choice or creation of frameworks, also prepares documents for the future software product and plans the deadlines. A software analyst presents the interests of the company's programmers to the client.

System analysts are in great demand. They are required at major corporations and smaller IT companies to complete various tasks. The average salary is **60,000—200,000 RUB** depending on the company.

SOFTWARE ARCHITECT

Projects software architecture, makes basic decisions about the construction of a program system and its technical interfaces. Develops technical scenarios, creates the protocols of the interaction between the program components, breaks it into technical subsystems. Basically, the skills of an IT architect are rather specific and are clear only to fellow IT specialists.

This job is offered at major IT companies that develop and sell software. Software architects can earn **160,000—220,000 RUB**.

SEO SPECIALIST

Promotes websites in search engines. Manages inner and outer optimization of a website, making it appear at a higher position in search results by particular keywords. Increases the amount of visits from search engines and improves website profitability.

Both private persons and big companies that do major tasks need SEO specialists. The salary is **35,000—65,000 RUB**, the work can be done remotely.

MEDICINE

The health and medicine field remains one of the most popular among applicants.

There are about 70 universities in Russia that offer medical education in every modern field—from general practice to radiology. You can learn a doctor's profession both at specialized medical universities and at separate medicine faculties of various profiles. You need to pass biology and chemistry exams plus additional ones that are different at every university.

Don't forget that it takes many years of studying to pursue a career in the medical field. First—6 years at a university, then accreditation during the last year of studies which gives you a permission to work right after graduating. You need to repeat the accreditation every 5 years. Then, in order to get a specialization, a clinical or target residency is required. The duration of study depends on the field. For example, you need to study for 2 years to become a pediatrician, for 5 years—a neurosurgeon. Postgraduates get an academic

degree after 3 years of full-time education or 4 years of part-time education. A doctoral degree—after 3 years of doctor studies.

The professions that deal with people's physical and mental health require great responsibility, serious and attentive approach, good judgment and precise actions.

Nowadays there is a wide variety of medical professions. Experts predict several more appearing in the following years. Let's take a look at some of them.

Derzhavin TSU's Medical Institute students

POPULAR MEDICAL PROFESSIONS

BIOMEDICINE

Biomedical technologies are a symbiosis of natural sciences, technology and medicine. Biomedicine specialists develop new treatments, cultivate stem cells for cell therapy and restoring damaged tissue and organs, study ageing processes and malignant cell transformation. The deeper understanding of the processes of the diseases allows gene therapy and cell engineering to develop.

This profession is offered at the specialized faculties of bioengineering, bioinformatics, chemistry and pharmaceuticals, molecular and cellular biology.

Possible positions

- Process engineer at research universities and centers
- Laboratory assistant at sanitary and epidemiological stations
- Research technician in:
 - biotechnology
 - pharmacology and pharmaceuticals
 - environment protection
 - medical diagnostics (biochemistry, virology, microbiology, molecular biology, genetics)
- Teacher of biology, chemistry, mathematics, ecology at school
- Specialist at environment protection services and organizations

Pros of the profession

- Trendy and versatile
- Prestigious and well-acclaimed
- High demand for qualified resources
- International business trips
- Variety of branches
- Possibility of making a discovery

Salary level

Bioengineers with less than 3 years' experience can expect **30,000 RUB** on average. The salary depends on the workplace: a teacher earns less than a head of laboratory or a head of scientific center. The salary increases with work experience. A skilled specialist in Russia earns **60,000 RUB** on average.

DENTISTRY

This is one of the most advanced, hi-tech medical fields. The profession of a dentist covers a wide range of activities: treatment, prevention, surgery, implants, orthodontics, etc.

Dentists study medicine, physiology, anatomy, pathology and pharmacology, as well as dentistry laws.

Possible positions

- Dentist-therapist
- Dentist-orthopedist
- Dentist-orthodontist
- Dentist-periodontist
- Children's dentist
- Dentist-surgeon
- Maxillofacial surgeon

Salary level

Currently, the best-paid specialists are the ones that perform paid-by-piece manipulations. Among them are gynecologists, dentists, surgeons, otolaryngologists. The consulting specialists such as neuropathologists, cardiologists, pulmonologists are in a less profitable position. Double profile specialists—cosmetologists, family doctors, anesthesiologists—can expect to earn more.

There is an option to combine private and state practice and eventually switch to a private clinic. It is a well-known fact that doctors earn more at hospitals than at polyclinics. Often their salary comes close to that of a private clinic doctor. On average, dentists in Russia earn from **37,000 to 150,000 RUB**.

DIETETICS

This is a medical field that studies nutrition of healthy people and those with acute and chronic diseases as well as metabolism issues.

A nutritionist's work consists of various tasks, such as making personal nutrition plans, counting calories, fat percentage, etc. Each case is unique, a patient's menu depends not only on his/her diseases but also on physical activity, environment, lifestyle, genetics, etc.

Not only overweight or chronically ill people need a nutritionist's help. Pro athletes also require a proper nutrition plan which takes exercise stress and unique body traits into account.

A good nutritionist is highly responsible, active, extraverted, attentive to details, friendly and open to patients, able to create a comfortable atmosphere so that they are willing to share their problems.

Salary level

Nutritionists can work at private and state clinics, day treatment centers, resorts, sport institutions. It is a rather popular profession. The average salary of a nutritionist ranges **from 18,000 to 90,000 RUB** depending on skills and the company.

In order to become a nutritionist, you have to receive general practice education first. Then you can specialize in dietetics, endocrinology or gastroenterology.

Of course there are many more popular medical professions. Among them are anesthesiologists, phthisiatricians, narcologists, psychiatrists, clinical laboratory diagnostics and ambulance specialists, etc. It is up to you to decide what to choose. Detailed programs on various subjects will help you to make up your mind about your future profession.

PROMISING MEDICAL PROFESSIONS OF THE FUTURE

Online doctor

It is considered one of the most promising medical professions. The doctor carries out the diagnosis and helps the patient online with the help of a video call, sensors and applications that scan the body and send the information to the doctor. It is expected that new technologies decrease the strain on polyclinics and medical staff, as well as help people from remote regions in a timely manner.

In Russia telemedicine is officially allowed since 2018. It is taught at the basic "Medical Treatment" course.

Tissue engineer

The tissue engineering is developing rapidly. Soon it will be possible to replace any damaged, lost or even absent because of birth defects human organ.

With the help of 3D technologies the specialist creates organs, bones and connective tissue that can be transplanted. It is expected that the development of this scientific field decreases mortality for 35 %.

You can learn the tissue engineering profession at a "Biotechnical Systems and Technologies" program and get an academic degree at a "Biomedical Engineering of Artificial Organs" specialization.

Geriatrist

A geriatrist helps older people to manage age-related changes in order to stay active for as long as possible. Nowadays the average life expectancy grows, the population of the country ages naturally, so this profession has become trendy and popular.

This education is offered as part of social work and age psychology related programs.

IT geneticist (gene consultant)

In the last decade, gene therapy has become one of the most rapidly growing medical fields. It works on changing human gene apparatus in order to fight diseases. A gene consultant picks the right treatment, nutrition plan, physical activity according to DNA tests. This specialist also works with couples, detects the future child's hereditary disease risks and prescribes additional researches and procedures allowing to minimize these risks.

This is quite a new field yet, but scientists already claim that genomics is a revolution in medicine. You can learn this profession at "Genetics", "Genomics", "Medical Biochemistry", "Molecular Biotechnologies" programs.

Medical device developer

Creates the hardware that doctors use for diagnostics and treatment. Medical gadget developer must be skilled in medicine and the way the device affects the patient's health, apart from being tech savvy.

The profession of medical device developer is available at "Engineering in Medical-Biological Practice" and "Biotechnical and Medical Devices and Systems" programs.

Medical robot project engineer

This profession is ranked among the top 5 most promising fields in healthcare. This specialist creates and programs robots for medicine, such as surgery. He or she must have technical knowledge to create the mechanism and programming skills to write the software, as well as being a medical pro.

The universities offer this profession at "Medical Cybernetics" or "Biotechnical and Robotic Systems" programs.

Cyberprosthetics and implant developer

Thanks to the newest technologies, the quality of life of patients with various traumas and pathologies has been significantly improving. This specialist develops smart prosthetics and creates artificial organs that are not rejected by the body. The prosthetics move in a very natural way and are easy to use.

This profession is taught at "Cyberphysical Systems", "Biotechnical Systems and Technologies" programs.

FREELANCE

The freelance market in Russia is gaining traction and is expected to grow steadily in the next 5 years. PwC informs that our country is among the top ten economies with world's largest freelance market by income. The research shows that it is mostly smaller companies that create the demand for "independent" workers in order to reduce expenses and gain access to broad expertise.

The PwC experts believe that the key fields that are going to use freelance work long-term are design, multimedia, IT, content and translation, finance, management and HR.

Over a half of freelancers earn **under 30,000 RUB** monthly. Most likely this is because such occupation is a side work in addition to the main job.

Key freelance fields

Design and multimedia	63 %
IT and programming	60 %
Content and translation	51 %
Finance, management, HR	43 %
Sales and marketing	23 %
Customer support	23 %
Projecting and manufacturing	20 %
Law	20 %

Key attraction factors of freelance

Flexible schedule	79 %
Remote work	76 %
Low salary at the main job	71 %
Option to combine freelance and the main job	68 %
No constant control	52 %

Average freelancer income in Russia (monthly, RUB)

Under 30,000	64 %
30,001—60,000	17 %
60,001—100,000	13 %
Over 100,000	6 %

43 % of employers, according to a survey, are eager to pay freelancers more than salaried workers

54 % of employers, according to a survey, hire freelancers via special platforms

Taking a look into the nearest future, the employers all over the world predict* that by 2025 13,5 % of all jobs will be taken by specialists in budding new professions. The research shows that today's children are going to change about 15 jobs by the time they are 38 and get about 10 various professions, of which 8 do not exist yet.

The rules are changing, and those who are able to adapt quickly can expect to succeed in their careers. New opportunities for self-realization are available now, people became more conscious about their career and work hours. The employers, prompted by the pros of remote work, started considering the regions where a new professional market with smaller salary expectations has been forming.

Choose your future profession wisely. Don't get stuck in one field only. Open your mind and do not be afraid of experimenting!

Lifelong learning is a long-term trend. Constant self-development increases your chances to find a well-paid job that fits your needs.

Forbes.ru, habr.com, childage.ru, atlas100.ru, SuperJob.ru

* *International economic forum report (Fall 2020)*

A recruiting IT company Superjob has conducted a survey which asked people living in Russia what advice they would give to their younger selves at the beginning of their careers.

The survey showed that, given a chance to go back to the beginning of their careers, 14 % would advise themselves to study harder. Every 9th one (11 %) would advise themselves to be more active and brave. 8 % of Russians would recommend themselves to change the work field, 6 % would praise and encourage themselves. Same number (6 %) would tell themselves to work harder. 3 % of the respondents would advise themselves to take thought-out and well-balanced decisions. The following advice—to be patient, independent and active, not to depend on others' opinions, to do what brings joy, strive for more—would give themselves 2 % of Russians each.

A third of respondents would advise themselves to take care of their health, give up bad habits, trust no one, appreciate what they have, never give up, believe in themselves, not to waste time, be calmer, not to be lazy, be themselves.

REPUBLIC OF TATARSTAN

KAZAN

RUSSIA'S THIRD CAPITAL

The Republic of Tatarstan has great scientific and educational potential and is well-known far beyond the country borders. About 150,000 students from over 120 countries attend its 44 universities.

ABOUT THE CITY

Kazan is a multi-national city with a 1000-year-old history, well-developed infrastructure, rich and exciting campus life. It is one of the most world-wide famous, convenient and people-friendly cities of our country.

It is located at the left bank of the Volga river, 800 km from Moscow. It is the 8th most populated city in Russia.

1,143,546

POPULATION

> 115

DIFFERENT NATIONALITIES

CLIMATE

Kazan's climate is moderately continental, with warm summers and cold winters. It has all the four seasons, which is typical of Russia.

AVERAGE TEMPERATURES

-10 °C

IN JANUARY

+20 °C

IN JULY

ART AND CULTURE

The capital of the Republic of Tatarstan is one of Russia's most beautiful and significant locations. It is a city with glorious historical and cultural heritage. Over 115 nationalities live here in friendship and tolerance. Kazan's religious objects are mosques, Christian Orthodox temples, other Christian churches, a synagogue, as well as Bahai and Krishna prayer houses.

If you are an art connoisseur, you are welcome to visit museums, theatres, concert halls, culture palaces, libraries. New cultural sites are being opened, such as Shtab creative space, Smena modern art center, Ugol art lab.

Kazan is famous in the country for its international forums and festivals: the Shalyapin opera festival, the Nuriev classical ballet festival, the festivals of Muslim cinematography and of Turkic nations—Nauruz. Russia's major theatres and world stars include Kazan in their tour schedules, the city museums regularly exhibit the treasures of the Hermitage, the Tretyakov Gallery and the Russian museum.

In 2019, Kazan joined UNESCO's network of creative cities in the musical field.

HOW TO REACH KAZAN

Kazan's Gabdulla Tukay international airport, located in 26 km south to the city, accepts direct flights from several cities of Russia and the world. There is regular connection to Ashkhabad, Baku, Bishkek, Minsk, Nur-Sultan, Tashkent, Tbilisi, Prague, Barcelona, Frankfurt, Istanbul. A flight from Kazan to Moscow takes 1 h 30 min, the airfare starts at 1,600 RUB.

You can reach the airport by public transport, a taxi or a suburban train. There is regular daily bus connection, № 197 Airport Kazan—Bus station Vostochniy, from 6 a.m. to 10 p.m. To reach the city center you need to change from bus to subway at the Metro Prospekt Pobedy station.

A quick way to get from the airport to the city center is by suburban train, which runs several times a day to the Kazan-Passazhirsкая train station. Travel time is about half an hour.

Kazan is a major train and transport hub. Trains to Moscow, Samara, Noviy Urengoy, Yekaterinburg, Adler, Anapa, St. Petersburg, Novorossiysk, Tyumen, Tashkent, Alma-Ata depart from the main train station Kazan-Passazhirsкая. The train station is five minutes' walk from the Kazan Kremlin.

Several trains depart from the Kazan train station in Moscow daily. Travel time is about 11-14 hours. The fare starts at 1,200 RUB.

You can also travel from Moscow to Kazan by bus. The express bus arrives at the Kazan bus station that is located in the Vakhitovskiy district, not far from the Rechnoy port. The fare is 1,400 RUB, travel time is 14 hours.

The train station Kazan-Passazhirsкая main building

SPORTS

Kazan is ranked among world's top 30 sport-friendly cities, per Ultimate Sport Cities international rating. Numerous stadiums, ice arenas, swimming pools, gyms and sport fields have been built.

The Kazan Arena football stadium with its 45,000-spectator capacity, whose name was changed to Ak Bars Arena in 2019, is a gorgeous landmark of the city. This stadium was the first in Russia to have been built to host the World Cup 2018.

TRANSPORTATION

Kazan's public transport system consists of one subway line which has 11 stations, numerous bus, tram and trolleybus lines.

The subway fare in Kazan in 2021 is 30 RUB if you pay in cash or with a credit card, and 27 RUB if you pay with a transportation card.

Kazan's subway is considered the safest in Russia. All the stations are equipped with scanners for extra safety. Apart from traditional metal detectors, each station has special equipment for explosive and radiation detection.

SUBWAY STATIONS

OLD AND NEW KAZAN

▲ The mosque in the Kazan Kremlin

The city is unofficially divided in 2 parts—historical and modern. The ancient quarters are in the central Vakhitovsky district. The Kazan Kremlin, the pride of the republic, listed in UNESCO'S World Heritage Sites, is located here, as well as Staro-Tatarskaya Sloboda, Baumana and Kremlyovskaya pedestrian streets, old mosques and Christian Orthodox temples, theatres and museums.

The modern city with its skyscrapers and malls is located at the opposite bank of the Kazanka River. It is connected to the historical center by the Millennium Bridge and three dams.

TRADITIONAL CUISINE

- **Echpochmak**—a pie with ground meat and potato filling
- **Kazylyk**—cured horsemeat sausage
- **Gubadiya**—a sweet or savory layered pie
- **Cheburek**—a flat deep-fried pie with meat and onion filling
- **Shcherbet**—sweet honey and fruit beverage
- **Chak-chak**—sweet pastry made from dough baked in honey

The Millennium cable bridge—Kazan's highest

PLACES OF INTEREST

Baumana Street is the central and one of the oldest streets of Kazan. It begins at the Kremlin walls and ends at the Tukay Square. A great number of cultural and historical monuments are within reach. During the Kazan Khanate, the Nogayskiy trail ran here.

Staro-Tatarskaya Sloboda is a colorful historical district of Kazan, located between the Nizhny Kaban lake and the Bulak channel. Its heart is the Yunusovskaya Square. Staro-Tatarskaya Sloboda is a great place to experience the culture of Tatarstan and see the traditional Tatar architecture.

Kazan is a wedding palace, opened in 2013. Its unique shape resembles a traditional cauldron for making food. This cup-like shape symbolizes the people of Tatarstan's traditional family values and unites the multinational world.

KAZAN KREMLIN

The Kazan Kremlin is the only remaining Tatar fortress in Russia which has a unique collection of mosques, churches and government buildings that symbolize the diversity and cultural heritage of the region within its walls. There are such landmarks as the Annunciation Cathedral, the "falling" Söyembikä Tower, the Spasskaya Tower and other ancient towers and cathedrals, the most famous mosque in Russia and Europe—Kul Sharif, historical and memorial buildings, museums and galleries, observation platforms.

There are zilants—dragon statues, symbols of the city, erected at the white stone walls of the Kazan fortress. According to a legend, this mythical creature that the statues were inspired by used to live on a hill near the Kazanka river. Nowadays there is the Assumption Zilant Monastery. During its construction, an ancient dungeon was found.

Since 2000 the Kazan Kremlin is listed among UNESCO's World Heritage Sites. The entrances are through the Spasskaya and Taynitskaya Towers. It is free to visit, however, it is recommended to book a tour where the guide shows you around the main places of interest and tells you a lot of interesting facts.

The Kremlin hosts various events, such as Museum Night with workshops, exhibitions, concerts, performances by art groups, plays, coffee ceremonies. The events are announced on the Kremlin's official website.

THE REPUBLIC OF TATARSTAN

Tatarstan is one of Russia's leading regions. It is one of the top 5 by the amount of industrial production. The republic's petrochemical complex, major mechanical engineering plants as well as advanced instrument making industry define its industrial profile.

Russia's biggest plants are concentrated here. Apart from being a major part of Russian and global oil and petrochemical market, they also create unique technologies at their production sites.

Not only the capital is rich in places of interest. The republic itself has a lot to offer to a tourist.

The Sviyazhsk Isle is a single village located on an isle in 30 km from Kazan. It has 30 cultural objects, some of them dating back to Ivan IV times.

The Bolgar Town is an ancient X century settlement. Its ruins are located at the Volga river. There are a khan's mausoleum, a white mosque, a large minaret and many other buildings.

The Rayif Monastery—you can visit beautiful churches and monasteries, take a walk at the lake, have a picnic or go boating all in one day.

The blue lakes of the republic are a must for nature lovers. The perfectly clear water that never freezes is surrounded by a reserve. It is a perfect place to relax after a noisy city and have some fresh air.

EDUCATIONAL PROS

- A great number of intellectually superior young people
- Significant financial support of the education system
- An experience in unique educational projects such as Algarysh
- High level of trust towards the education system by the population
- Major educational and research centers
- Well-developed national and ethnocultural education system
- High level of digitalization and internet access at educational institutions

“

Yanxia Li, China

I am studying Russian as a foreign language at the Institute of Philology and Intercultural Communication. I came to study in Russia because China and Russia always were good friends. Compared to Western countries, Russia offers more affordable tuition fees.

I like Kazan very much. It is the third largest Russian city famous for its beautiful landscapes, good environment, and universities.

I chose KFU because it's very famous. Many of my Chinese teachers recommended it to me. They were always telling me about KFU and its research areas.

I don't think that Russian is particularly difficult, but you really have to study it thoroughly.

In the future, I will come back to my country and take a state service exam, or stay in Russia, if I have such an opportunity.

“

Rauf Sabirov, Sri Lanka

One would think that Kazan is a bustling million city, where all people have their troubles, but this thought is delusive. It's comfortable and cozy here, like at home.

Before I came to Kazan, I knew next to nothing about this city. I liked the architecture of the city. There are unusual buildings that have a unique and rich history. I have a collection of pictures of Kazan sights. Most of all, I like the streets of old Kazan—Kremlevskaya, Pushkina, and Staro-Tatarskaya Sloboda (Old Tatar Quarter). I like that the city combines modern and ancient buildings.

I was surprised by some open-hearted people in the streets. They can just come up and talk to you. I also like national Tatar cuisine, especially chak-chak, gubadiya, echpochmak.

“

Elmira Masoud, Kazakhstan, History Faculty

During my studies at Kazan Federal University, I got not only in-depth knowledge and valuable professional qualities but also true university education. The possibility of combining studies with public work in the students' council of international students and also in the association of international students in Kazan allowed me to realize my ideas, I had leadership skills and useful experience like organizing various events, and also gave me faithful friends from different countries.

“

Sultanbek Timerbaev, Kyrgyzstan

It was my father who told me about Almeteyvsk State Oil Institute. I didn't plan to go to a foreign country, but my parents wanted me to study in Russia. I followed their advice and decided to send my documents to ASOI. I successfully passed my entrance exams and got a state-funded place.

I like the city and ASOI dormitories very much. I feel safe in Almeteyvsk!

“

Jumanazar Kuliev, Kyrgyzstan

People often ask me why I chose Almeteyvsk from all Russian cities. To be honest, the choice was obvious for me, because my friends studied in Almeteyvsk. They spoke well of this city and ASOI. Local people are communicative. Besides, the region has a very convenient location for travel enthusiasts. It's the heart of Russia.

“

Kamil Gabitov, Kyrgyzstan

There is a Tatar expat community in Bishkek. They told me about this institute. I decided to study in Russia when I was at school.

The campus often holds various festivals and contests. They do everything we need to get acquainted and make friends with new people, learn about other cultures.

- Student media center
- 12 sports clubs
- Irbis Tourist Club is a two-time laureate of the republican award "Student of the Year of the Republic of Tatarstan" in the Best Social Organization category

“

Al Amin Umaru Beyki, Republic of Chad. Kazan SAVM graduate

I liked studying at the academy very much because it is one of the oldest and best Russian higher education institutions. It has highly qualified teachers.

I came back home after graduation. I worked at a key veterinary laboratory, the vaccine production department. Then I moved to another department—the parasitology department. I really liked my work, and I decided to pursue a PhD degree. As I already knew how interesting it was to study at Kazan Veterinary Academy, I decided to continue my studies here. I recommend this academy to all my acquaintances and compatriots.

If you have any doubts about applying to the academy, put them off and apply. You won't regret it!

“

Israt Oyshi, Bangladesh. Pre-university Training Center student

My dream was to enter the university where I would study space science. Soviet spaceman Yuri Gagarin and Tereshkova, the first woman in space, inspired me.

I wanted to study in Russia, but I had to learn Russian. To be honest, it was hard for me. Russian is difficult. But if you have good teachers and friends around you, you can do everything.

I was looking for a place to study Russian for a long time. I was comparing conditions and tuition fees. I chose Kazan and this academy. I've never regretted opting for this Center. After completing the courses, I will apply to one of the Moscow universities.

“

Matias Aouendo, Republic of Benin. Kazan SAVM graduate

A big hello from Africa to everyone! I work as a teacher at the University of Biotechnology and Management in Benin. Besides, I breed rabbits and snails. In 2018 I completed my PhD degree at Kazan SAVM, defended my PhD thesis, and became the Candidate of Veterinary Sciences in Veterinary Pharmacology and Toxicology. The academy has experienced, open-hearted and great staff that always helped and supported us.

I advise all applicants to choose Kazan Veterinary Academy to fulfill their dream.

INTERNATIONAL COOPERATION

- Academic exchange
- Agricultural internships and work placements: APOLLO, LOGO, PRAXX

MBA-AGRIBUSINESS INTERNATIONAL PROGRAM

- 7 modules during two years in English and Russian
- Interactive classes with the international team of teachers and specialists
- Workshops, roundtable discussions, master classes from top industry experts, seminars, and case studies
- Distance independent learning
- One-to-one advice from teachers and specialists
- Internship at European companies and firms (the Netherlands, Germany, Belgium)
- Business English and computer technology

STUDENT BRIGADES

Over 20 % of full-time students undertake their work placement in student brigades

- 11 brigades
- > 1,500 students
- Average wage is **12,225 RUB**
- **Areas of activity:** mechanization, landscaping and infrastructure development, crop production, mechanical engineering, plant protection, volunteering

To promote employment, the university maintains close collaboration with the Ministry of Agriculture and Food of the Republic of Tatarstan.

Zaschita student labor brigade

PRE-UNIVERSITY EDUCATION AND GRADUATE EMPLOYMENT CENTER

- Maintains employment collaboration with major agricultural companies (work placements and pre-graduation internships, job fairs, master classes, field classes, tours)
- Provides methodological, psychological, organizational support for students and graduates
- Offers complete and up-to-date information about employment on the university's official website

“

Zevdie Abigail Endalkachev, Ethiopia

My university is a place where I became an adult. Kazan SAU is not only the university where I got my education but also my second home. I met a lot of great teachers, professors, and fellow students here.

I am grateful to the university for my upbringing and excellent education. Here I realized who I was.

I like everything about my university, including the rich history of my faculty. I am proud to be a graduate of this great university.

I am so happy to have chosen Kazan SAU.

“

Abdullahi Mohamed Ibrahim, Somalia

I've been pursuing my Master's degree at Kazan State Agrarian University for almost a year. I am majoring in Agricultural Mechanization Technology and Equipment.

My teachers are friendly, the quality of education is excellent. I like the practical side of university study most of all. After completing my Master's degree, I plan to pursue a PhD degree.

“

Kemran Makhtumov, Turkmenistan

I like that our teachers treat students with respect and try to help us, though we have some troubles with the Russian language. We gain state-of-the-art knowledge. I am sure that I will easily find a job and start a successful career with the Kazan SAU diploma!

“

Ilnur Nasyrov, Kazakhstan

I like Kazan very much. This city is friendly, safe, and full of cultural attractions. Kazan SAU gives us state-of-the-art and practical knowledge. The dormitory I live in is comfortable and well-furnished. We have Wi-Fi and can do sports here. Each educational building has a café offering quite affordable prices.

I am satisfied with my choice and very happy to progress and rise to the top with Kazan SAU!

PRE-UNIVERSITY TRAINING CENTER FOR FOREIGN CITIZENS

Russian as a Foreign Language course

Duration October–May

Tuition fee 100,000 RUB

TEN DAYS PRIOR TO ARRIVAL IN KAZAN

- Send a copy of the document you need to enter Russia, inform the university about your arrival date and border crossing point (name of the airport, or crossing point when traveling by train or by road)
- In Russia, you must retake a PCR test within 72 hours (you can do it at the airport). After submitting the results of two negative PCR tests, you will be allowed to take entrance exams

UPON ARRIVAL IN KAZAN, YOU MUST SUBMIT THE FOLLOWING

- Medical certificate with a notarized translation into Russian
- Results of fresh blood tests and fluorography examination
- Vaccination certificate
- Certificate of negative Covid-19 test (PCR test) taken at least 72 hours before you arrive in Russia
- 6 photos (3×4 cm)

DOUBLE DEGREE PROGRAM

Russia's unique international project in Architecture and Civil Engineering.

Bachelor's programs (BSc Courses)

Architecture, Civil Engineering, Building Design, and Information Systems in Architecture and Civil Engineering

- University of East London (UEL), Great Britain 

ITALIAN CENTER FOR EDUCATION AND CULTURE IN THE REPUBLIC OF TATARSTAN

It aims to promote Italian culture and the Italian language in Tatarstan, establish partnership relations among the universities, cultural workers, organize staff and student exchange between the universities of Tatarstan and Italy.

It was established at the International Relations Department.

CAMPUS

Cozy European-style campus in the city center

- Comfortable dormitories: rooms accommodate two or three persons, shower and toilet rooms are located in blocks, the kitchen is on the floor
- Modern research and education centers
- The KSUAE multifaceted sports center is the 2013 Summer Universiade facility
- The Mesha sports and recreation camp
- The canteen is one of the coziest places in the university, where you can have tasty and cheap meal
- Comfortable, light, and spacious assembly hall for student events
- A parking lot for students and staff

WORK PLACEMENT

For effective practical training, KSUAE assigns responsible supervisors for all institutes and departments of the university.

- Self-presentation and career guidance advice
- Informing students about the job market situation

EMPLOYMENT AND INTERNSHIP CENTER

The staff members will help you make a resume, give you recommendations on how to pass an interview, and inform you about employment opportunities, taking into account your education.

KSUAE GRADUATES

93 %

HAVE A JOB

90 %

RECEIVE SPECIALIST TRAINING APPLICATIONS FROM ENTERPRISES

All KSUAE graduates have general civil engineering skills. They can successfully work with geodetic equipment, know the basics of architectural design and structural analysis, can use construction industry technologies, which adds to the diversity of their future employment opportunities.

FOREIGN PARTNERS

- Great Britain
- Italy
- Germany
- Portugal
- Greece
- South Korea
- Egypt
- Kyrgyzstan
- Azerbaijan
- Tajikistan
- Uzbekistan
- Armenia

GRADUATES AND STUDENTS' WORKS

- Kul Sharif Mosque
- The Lazurnye Nebesa (Blue Skies) residential estate
- The Korston hotel, shopping and entertainment center
- The Basket Hall sports center
- The GUM shopping center in Kazan
- Improvement of the garden square near the Civil Acts Registration Office in the Kirovsky District as part of the 100 Garden Squares program
- Examination of the Kazan Arena stadium foundation
- Designing building structures of the Kazan international airport terminal
- Designing reinforced concrete rings for building the Kazan metro
- Designing the Mordovia Arena stadium stands for the FIFA World Cup
- Design of the temporary roof of the Kazan Arena stadium for the 16th FINA World Championships
- Installation of polymer composite reinforcement at the Kazan airport ramp
- Restoration of Merchant Sergei Zemlyanov House
- Restoration of the Pentecost Church in Sukonnaya Sloboda (Cloth Settlement) in Kazan

ASSOCIATION OF FOREIGN STUDENTS

- Assistance in social adaptation to Russia
- Legal and social support
- Cultural and sports events

SPORTS

- KSUAE students are winners of the University Spartakiad that includes 31 sports, international competitions
- The Tozuche sports center includes a hall for sports games, a wrestling hall, a strength sports gym, a boxing hall, an aerobics hall, a table tennis hall

“

José Sílvio Camutenya, Angola

I've been living and studying in Russia for two years already. I see no difficulty in studying Russian because I have great teachers. They play a key role in international students' life because they lay the groundwork for the perception of the Russian culture.

The Internet is of great help to me when I prepare for my classes. You can find various textbooks, study aids, tests on the Web. Actually, I enjoy studying the materials from different Russian sources.

The most difficult thing about learning Russian is the fear of making a mistake when communicating with Russians. If you overcome this fear, you will succeed.

I really like taking part in the university's social life. Sometimes I feel homesick. But I have great friends, fellow students, those who are always ready to help me.

I am very fond of Russian classical literature and often read poems by Alexander Pushkin and learn them by heart. Wherever I am, whatever the future holds for me, I will always love Russian culture and literature.

“

Fanila Miguel, Mozambique

It was strange for me to find myself in cold and snowy Russia after the warm climate of the Indian Ocean and its warm breezes. But I fell in love with this country with all my heart: the climate, the seasons, and the country with lots of cities, traditions, and, above all, hospitable, good-natured people.

Needless to say, it was difficult to memorize Russian verbs, the complex grammatical system of nouns, get accustomed to and understand fluent speech. To cope with the difficulties of the Russian language, I read a lot, listen to music by Russian composers, watch Russian movies.

I haven't decided yet whether I'll stay and work in Russia or not. I feel homesick. But with every passing day, I become more and more attached to my university, teachers, the most beautiful Russian city—Kazan. I am so happy to study at one of the top universities—KSUAE and live in the third capital of Russia.

Adaptation workshop for international students

International Student Day

“

Akhmajon Oev, Tajikistan

Was it difficult for me to enter a Russian university? I didn't have a lot of difficulties, but I was scared. After all, Russia was quite a different country. I was very nervous about whether I'll be able to live and study here. I had come two months before the exams started, and I almost didn't know Russian. My adaptation went well, but I had a language barrier. Russians differ from my compatriots. They are very serious. I think it's because of the cold.

Now I am studying at the Faculty of Theater, Cinema, and Television. My major is Television Producing. I take part in international film festivals, events held by the Assembly and Tatarstan Peoples' Friendship Center.

“

Bakhtierzoda Shakhzod Bakhtier, Tajikistan

Preparing for my university entrance exams, I was working hard and was nervous. And finally, I got a quota in Kazan. I had some difficulties, but I got over them. I adapted very well. I improved my Russian, got acquainted with quite a different culture and life. Russians are substantially different from my compatriots. For the most part, these differences are related to religious confessions. But I like living here.

“

Kevin D'arc, Brazil

Before entering a Russian university, I had been trying my hand in different professions and changed three faculties: political studies, visual art, IT. But my life is inextricably linked with cinema. I've been shooting since I was four years old. In 2018 I won a grant for studying in Russia.

Why did I decide to come here? I don't know. I just took an interest in it. In the beginning, I had some difficulties and was cold. When I came to Russia, I only knew one word "privet". Russian is very difficult, but I speak it, as you can see. Local people are gloomy, but only at first glance. If you get on well with Russians, you'll see that they are kind and sympathetic.

International graduates

International students on a tour to Bolgar (Tatarstan)

Delegation of Kazan SMU international students at the 6th BRICS Youth Summit in Ulyanovsk

Farima Behbudi, Iran

I am studying Russian online at Kazan Medical University. Our teacher teaches us to speak, read and write in Russian, tells us about famous scientists (Newton, Lomonosov), composers (Tchaikovsky, Beethoven), painters (Shishkin, Repin), hero Shavarsh Karapetian. She teaches us to be kind and hard-working.

I believe that we really need such psychological support during the pandemic when students can't come to Russia to immerse themselves in the cultural and linguistic environment. Studying at the preparatory department of Kazan SMU, I felt like a scientist. Under the supervision of my teacher Leisan Galiakhmatovna Ibragimova, I took part in five language Olympiads, literature and poetry contests, the university student conference.

In this academic year, I've learned how to speak at conferences, make presentations, set goals and objectives in my research paper. I've also realized that I like to be a winner and leader. I will need this experience when I study at Kazan SMU's Faculty of General Medicine.

I am also studying mathematics, physics, chemistry, and biology.

Ishara De Silva, Sri Lanka

I am studying at the preparatory faculty to learn Russian for my future life in Russia and to prepare for a degree program. I want to enter Kazan SMU to study medicine and become a surgeon.

I studied Russian at the Faculty of International Students, so I took part in language Olympiads, the Total Dictation—2021, the essay contest dedicated to the International Mother Language Day, and other contests. I managed to win prizes and get the winner's certificates. University education is a research experience that I will need when I study at the Faculty of General Medicine.

Russian language teacher Leisan Galiakhmatovna helped me prepare for the student conference organized by the university. I took first place.

I'd like to say many thanks to all my teachers, especially the Department of Russian and Tatar Languages, for the excellent language courses and home-like environment in our group. I am so happy to study at the preparatory faculty of the well-known Russian university because it's a new experience for me.

KSPEU is a leading specialized power engineering university in Russia. It has been training specialists for power engineering and industry of Russia, CIS countries, and other foreign countries for over 50 years. It is a member of the Power Engineering Educational Consortium.

Founded in 1968.

Tuition fees per year
113,600—171,100 RUB

🇬🇧 ENGLISH-TAUGHT MASTER'S PROGRAM IN SMART ENERGY SYSTEMS

The program is delivered as part of the Establishing Smart Energy System Curriculum at Russian and Vietnamese Universities (ESSENCE) project under Erasmus +.

SCIENCE

KSPEU is a university that is dynamically developing in the field of science and innovations. The strategic priorities of KSPEU's research are aimed to implement the priority areas of the science and technology development strategies of Russia and foreign countries:

- Transfer to advanced digital smart manufacturing technologies, robot systems, new materials and design methods
- Transfer to environmentally-friendly and resource-saving power engineering, efficiency improvement of production and deep conversion of raw hydrocarbons, development of new energy sources, energy transportation and storage methods
- Transfer to highly productive and environmentally-friendly agricultural and aquatic enterprises
- Combating anthropogenic, biogenic, socio-cultural threats, terrorism, ideological extremism, cyber threats, and other threats for the society, economy, and state
- Territorial connectivity of Russia due to the development of smart transportation and telecommunication systems

INFRASTRUCTURE

- 6 educational and laboratory buildings
- 4 comfortable high-rise dormitories within walking distance of the educational buildings
- The library with a complete literature stock
- Technology park: the engineering center "Computer Simulation and Engineering in Power Engineering and Power Engineering Industry"
- Unique training and production ranges: 110/10 kV Substation, 0.4–10 kV Distribution Network, Heating Supply Range of the Housing and Utility Sector
- Danfoss Multidisciplinary Science and Technology Center and Evan Research and Education Center
- ElectroSkills Applied Competencies Center established with support from Shneider Electric
- Energy Efficiency Technology and Competency Center
- Schneider Electric, Bosch, Siemens, Maxim classrooms and laboratories, a physical and chemical testing laboratory
- VOMM, SARAD engineering centers
- Youth Business Incubator
- Energy Youth Innovation Center
- Interactive museum: backlighting, an audio guide in three languages, a film demonstration panel
- The Shelanga sports and recreation camp

Employment of foreign citizens

Job openings

KSPEU is taking part in the 7th National Championship "Young Professionals" (WorldSkills Russia) held at Kazan Expo

Students undertake their internships at power engineering enterprises in Kazan, the Republic of Tatarstan, and the Volga region: Tatenergo, TGK-16, Nizhnekamsk Thermal Power Plant, Setevaya Companiya, Tatenergosbyt, and many others.

Training lessons at the 110/10 kV substation on campus

KSPEU graduates have made an enormous contribution to the development of industry and power engineering in Russia. Among them are outstanding scientists and practical workers, heads of top enterprises in Tatarstan and Russia.

The Tatarstan Republic President is opening the Energy Efficiency Technology and Competency Center with the participation of Russian Energy Minister Alexander Novak

KSPEU UNION OF INTERNATIONAL STUDENTS AND PHD STUDENTS

INTERNATIONAL FRIENDSHIP CLUB

The Club holds events showing peoples' national characteristics, culture, customs, and traditions, develops students' creative and intellectual abilities, familiarizes Russian students with cultural values of various countries, and international students with the culture of Russia's peoples.

 vk.com/public193974429

Daniel Paluku Lwanzo, Democratic Republic of the Congo. The holder of the Russian Government and the Russian President scholarships, the winner of the All-Russian RFL Olympiad for International Students

I finished school with flying colors and found out that there was a chance to study in Russia for free and get a scholarship. I took the test and passed the competitive selection. I chose Kazan because life in Kazan is half as expensive as in Moscow.

I had to put a lot of effort into learning Russian. But now I have an excellent command of it. I do research, speak at conferences, which is impossible without good knowledge of the language. I have to write articles in Russian.

I've spent four years in Russia and never came back home because the flight is very expensive. But I don't regret studying in Kazan. I chose Russia myself, and I like living here. After graduation, I plan to come back home.

“

Ahmed Mohamed, Egypt. Student majoring in Renewable Energy Sources

I came to study in Russia because Egypt and Russia always were good friends. Tuition fees in Russia are lower compared to Western countries.

I like Kazan very much. It's the third largest city in Russia. It is famous for its beautiful landscapes, good urban environment, and universities.

I chose KSPEU because it's very famous. Many of my teachers in Egypt recommended it to me.

I don't think that Russian is particularly difficult, but you should work hard to learn it.

In the future, I'll come back home and find a job at one of the top power engineering companies. Maybe, I'll stay in Russia if I have such an opportunity.

“

Salomão Jeurisio Bonde, Angola. Student of Institute of Electric Power Engineering and Electronics. The winner of the contest for international students in the Author Song category

A year after I had entered the university in my country, my school principal called me and told me that there was an opportunity for me to study abroad. I had to choose from Portugal, Morocco, and Russia. I didn't think twice and chose Russia at once!

I liked everything at KSPEU: the way students are assessed, grade books, the system of accumulating the scores you need to be allowed to take exams. What is particularly convenient is that you can see your scores and all news about student life on the university's official website and in your account.

Teachers treat students as equals. You can contact them after classes to ask some questions or share opinions. But I prefer laboratory and practical classes to lectures. You can see the result of your work immediately.

I take part in all festivals and contests held by KSPEU, write songs in Russian and sing them to guitar. I also do photography and handball.

The only thing I still can't get accustomed to is the snowy winter in Russia. In Angola, we think that it's cold outside when we have +18 °C.

Now I am pursuing my Master's degree. I am sure that I'll find a good job after graduation because the Russian diploma is worth its weight in gold in my country.

Abdelatif Moumed, Algeria

My first year in Russia was one of the best in my life. I learned one of the most popular languages in the world thanks to the intensive training program and the teachers who took care of our studies, health, living conditions. They were like a second family to us.

Thanks to the tours held by the university, I got acquainted with one of the most beautiful places in Russia—Kazan city. This city is really worth visiting because of its natural beauty, ancient history, and cultural diversity. Besides, I got acquainted and made friends with students from different countries, learned about different mentalities, cultures, and ideas.

Joana Berova, Bulgaria

I already have one education that I got in Bulgaria, but I decided to get a second one. I found out that there was an opportunity to study in Russia, and I want to thank the Russian Culture and Information Center in the city of Sofia for this chance. As I have Russian roots, I decided to try, and KNRTU-KAI chose me. I am proud to be one of the KAI students. I hope that KAI will also be proud of me someday.

Sinan Atmaja, Turkey

The preparatory faculty was a surprise to me. When I came for the first time, I thought I would study the language only. But we visited museums and theaters. We got so interested that we fell in love with Russian culture. We learned a lot, saw and got to know a lot of things. KNRTU-KAI offers excellent education. Thank you for that!

Giuseppe Giannino, POLIBA University, Italy. Exchange student

When I was leaving Italy, I knew nothing about Kazan. But when I got to know the city better, I liked it very much. I managed to see and do a lot of things during four months of my study placement, I learned a lot of new things about science, and I am so grateful to the university for this opportunity.

KAI always helped us, and we had no problems with courses and visas. We lacked nothing—everything was at its best. I advise international students to take a study placement at KAI because you won't feel lonely there and this university will give you the knowledge you won't gain at home. Local people are good, the university and teachers welcomed us. Russia has a different culture, but you shouldn't be afraid of it.

European Diploma Supplement

After graduation, students have an opportunity to obtain a European Diploma Supplement that will simplify the recognition of their KNRTU degree by foreign educational institutions and employers.

KNRTU virtual tour

Graduates hold key positions at defense, light, and food industry enterprises, in state and municipal management, the social sphere. They can work as engineers, process engineers, chemists at chemical and petrochemical enterprises and do research.

State-funded students get monthly scholarships, are eligible for the Russian President Scholarship, a special state scholarship of the Republic of Tatarstan, Vladimir Potanin Scholarship, the Award of the Academy of Sciences of the republic for Asian students.

The **TechnoStart** PhD research projects contest winners get 300,000 RUB from the university and 300,000 RUB from the partner enterprise.

STUDENT INTERNSHIPS, WORK PLACEMENTS, PROJECTS

- Work placements and pre-graduation internships at the top specialized enterprises in Tatarstan and Russia
- Participation in the implementation of enterprises' cases and projects, which allows students to do real-world production tasks during their studies and ensure their subsequent employment
- Student internships abroad at foreign partner educational institutions

SUCCESS STORIES

Le Fyok Kyong, Vietnam

Da Nang University of Technology research team leader

Candidate of Chemical Sciences, completed his PhD degree in Ecology (Chemistry) at KNRTU. After finishing his studies, he returned to Vietnam and started teaching chemistry. Now Kyong is the leader of the Da Nang University of Technology research team working in the field of nature protection. He conducts green chemistry research.

Buy Din Nyi, Vietnam

KNRTU graduate, Head of the Department of Biotechnology and Ecology of Viet Tri University of Industry

Candidate of Chemical Sciences, defended his PhD thesis in Kinetics and Catalysis at KNRTU in 2013. After returning to Vietnam, Nyi was invited to teach chemistry at Viet Tri University of Industry. Now Buy Din Nyi is the Head of the Department of Biotechnology and Ecology, works as a manager at the KNITU's representative office in Vietnam.

ADAPTATION

The Faculty of International Educational Programs offers advice on studying, accommodation, documents, further higher education programs, medical care, transportation in the city.

EVENTS

- The Volga Region Interuniversity Peoples' Friendship Festival. Development of the dialogue, cultural relations among students representing different nations
- The Festival "Houses of Students and PhD Students are a Territory of Creativity." Presentation of nationalities of students living in KNRTU students and PhD students' houses
- 1 day travel—one-day activist school for international students
- National cuisines—acquaintance with other peoples' national traditions
- The Welcome to Russia Culture Week
 - familiarization with culture and history
 - familiarization with the Constitution
 - familiarization with the representatives of the International Student Union and Peoples' Friendship Club
 - round table discussion "Migration Law Basics"
 - meetings with the Ministry of Internal Affairs representatives
- The Foreigner in Russia business game is a quest game familiarizing international students with the situations where they must know migration regulations: hotel check-in, returning from abroad, living in the apartment, etc.
- What? Where? When? on the topic "Tanyshygyz" (Let's get acquainted). International students actively communicate in their non-native (Russian) language
- Nowruz—familiarization with the national festival

Senior international students meet first-year students at the airport and help them settle down before they start studying in groups.

Peoples' Friendship Festival

“

**Zhang Dali, China. KNRTU graduate,
Director of Ki-RO Trading House**

Kazan National Research Technological University is my second home. My KNRTU teachers gave me the necessary knowledge and skills and made me feel at home.

KNRTU helped me learn and introduce new technologies into my work. KNRTU is a platform that united China and Russia, strengthening relations between them.

“

**Nazar Atdaev, Turkmenistan. KNRTU
student**

I was so lucky to study at such a friendly and modern university as KNRTU. The university offers a wide array of programs and events for active students. I'd like to say that university student life is eventful and exciting. You can easily make friends here, especially if you are as communicative as I am.

“

**Ntsumu Ryut Shelton, Congo. KNRTU PhD
student**

I've been doing research for a long time, so I decided to pursue a PhD degree. I made this decision for one more reason: I'd like to become a politician in the future. In my country, it's desirable to have a PhD degree.

I won the TechnoStart contest and a scholarship from the university and enterprise in Congo. My project in this contest is related to the theme of my thesis that I defended at Kazan National Research Technological University.

Now I publish articles and take part in research conferences.

“

Dilfuza Kamalova, Turkmenistan. Graduate of the Faculty of Mathematics and Information Technology

I am very lucky to have chosen NCSPU. Five years ago, I entered it with ease. My brother used to study here at the Faculty of Physical Training and Sports. He also got his bachelor's degree in 2019 and currently has a great job in his degree field in his home country. It was he who advised me to enter NCSPU.

I am a foreign national. Despite this, the management, teachers, the international department and the entire staff of the university treated me with respect and understanding during my whole stay in Russia. On behalf of all the Turkmen students I would like to express my special gratitude to the teachers for giving us all the necessary knowledge for us to become real professionals.

I am sure that the skills I have got at the university will help me succeed in the future. I have already decided to pursue my Master's degree and then go back to Turkmenistan and find a job according to my degree.

I would like to wish the NCSPU applicants to easily overcome any obstacle on their way to the goal. May your student life be interesting and full of events. Just know that NCSPU is a big family where anyone feels comfortable to study. I wish you new skills, success, kindness and happiness!

“

Lisa Maltin, France. Student of the University of Reims

My friends and I had a teaching internship at NCSPU. On arrival we were greeted by the international relations specialists. On the same day we met the NCSPU students who accompanied us during grocery shopping and then invited us to a cafe. We were accommodated in the rooms for international students at the dormitory. Russians are so hospitable!

Russia is so vast that everything seems much bigger than in France. We were shocked at the amount of snow but didn't feel that cold except for a few days when it was below -30 °C. We have tasted a lot of Tatar delicacies. For example, belesh—a turnover pie with beef, potato and onion filling. And the most famous dessert in the Tatar cuisine is chak-chak, an Oriental pastry made from dough and honey.

The NCSPU students have helped us to learn the Russian language. We have learned some greeting expressions such as "spasibo", "pozhaluysta", we know the names of colors, are able to describe weather and clothes in a few words. The most difficult for us in the Russian language is the alphabet, it differs from the Latin characters. Russia uses Cyrillic, so we struggle with the pronunciation. But despite all these difficulties, we had a great time trying to speak Russian.

This trip was the most useful experience in my life. I hope to come back here soon to get to know more and to see the people we used to be with again.

DISTANCE LEARNING

The university has introduced an **Integrated University Management System (ISU VUZ)**. The student does not need to go to the university to have lecture classes and tests. Access to educational and control materials, consultations with teachers, and participation in classes are available through personal accounts in the ISU VUZ.

Admission of foreign citizens

TISBI is the only University in the world that participates in three international educational programs of UNESCO:

- UNITWIN—UNESCO Chairs
- UNESCO Associated Schools Network
- UNESCO—UNEVOC Center for Technical and Vocational Education and Training

The team "We are from Algeria" is the prize-winner of the City Olympiad in Russian as a Foreign Language "Russian Language: The Start in Your Profession"

The Student Creativity Center is receiving an award for its participation in the charity concert as part of the contest "Human is a Big Heart"

Rector Cup

The Model UN educational and business game supported by the UNESCO International Chair

Edouard Bizimana, Ambassador Extraordinary and Plenipotentiary of the Republic of Burundi, is visiting TISBI

INTERNATIONAL COOPERATION

18 foreign universities, research and education centers and companies from 14 countries

- Moldova Bulgaria Belarus
- Germany Latvia Finland France
- Mozambique China Namibia
- South Korea Uzbekistan India
- Burundi USA Kazakhstan

- Internships and study and work placements
- Programs for international cooperation in education, science and culture
- Participation in joint educational programs of ERASMUS, ERA NET Rus Plus
- Cooperation with UNESCO and representation of interests of international organizations such as FISU
- Semester, summer/winter schools
- TOEFL and IELTS preparation courses

DOUBLE DEGREE PROGRAMS

- Bachelor's, Master's programs
University of the Potomac, USA
- Bachelor's programs
South-Eastern University of Applied Sciences XAMK, Finland

ACADEMIC EXCHANGE

- Korean/Russian as a Foreign Language
Shinhan University, South Korea
- Russian/Chinese as a Foreign Language
Chang Chun University, China

The University of Management "TISBI" provides fundamental training for IT specialists in the following areas: data transmission networks, cybersecurity, programming, system administration, Internet of Things.

Students of the Faculty of Information Technologies have a unique opportunity to study at CISCO Networking Academy for free and obtain an international certificate.

TISBI graduates hold key positions at ministries and government agencies, major corporations, take an active part in the region's social and creative life, successfully run their business.

Young specialists work or continue their studies abroad:

- **Ruslan Kabirov**, a graduate of the Faculty of Humanities, is Plenipotentiary Representative of the Republic of Tatarstan in Turkmenistan 🇹🇲
- **Sofia Nikolaeva**, a graduate of the Faculty of Humanities, is a staff member at the aircraft maintenance services company in the UAE 🇦🇪
- **Petr Malakhaltsev**, a graduate of the Faculty of IT, completed his Master's degree at a Hungarian 🇭🇺 university after finishing his Bachelor's degree in Kazan
- **Gusel Nurieva**, a graduate of the Faculty of Humanities, completed the course of study under a grant program in Turkey 🇹🇷

TISBI RECRUITMENT AGENCY

- Provides communication between graduates and employers, monitors the job market, and holds a number of career guidance events aimed to promote effective employment:
 - tours to the republic's enterprises and top organizations
 - meetings with top managers and practical experts
 - presentations and master classes from international companies
- Gives individual consultations on personal development, career guidance, employment, and career development. Specially designed workshops help acquire job-seeking skills, develop a career growth strategy, overcome a psychological barrier while dealing with prospective employers

WorldSkills Championship in Kazan

First-year Student Day Festival

Student Spring

Miss and Mister TISBI

Vesennyya Kapel Festival

“

**Hamza Karim Mahmud Mustafa Refay,
Egypt. First-year student**

I am so happy to study at the University of Management "TISBI" as I had heard about it long before I came to Russia.

I like our university staff because they are very friendly. The dean's office members always help me.

Our group is very united. Such a great environment helps me do well in my studies in a foreign country.

“

Aziza Jullieva, Turkmenistan. Fourth-year student

I am finishing my studies at the University of Management "TISBI," I'd like to say that our university teachers are kind and supportive, which is important nowadays.

When I was transferred to TISBI, I joined the best group in the whole batch. I used to study at two other universities and can say that I like TISBI best. In the beginning, the dress code was a great surprise to me and even made me angry. But then I realized that this dress code was a great advantage and kind of perk, on the contrary. Indeed, such "perks" educate and discipline students and even develop a taste for classic style!

I'm grateful to this university for everything, and I am moving forward with confidence!

“

Khaydar Mirov

I'd like to express my deepest gratitude to the International Department of the University of Management "TISBI" for cooperation and all possible help, for individual approach, and their professional competence. Thank you very much!

MIGRATION REGISTRATION

FOR INTERNATIONAL STUDENTS

Dear friends, here's some more information about the aspects of international students' migration registration in different regions and universities of Russia. The KNRTU and KSUAE staff members will tell you how to get registration after entering a Kazan university and what to do in a difficult situation.

STUDENT VISA EXTENSION

At least 50 days before your valid visa expires, you must contact the university's international dean's office at the address: 68, K. Marx Street, Room 255, Kazan, and submit the following documents:

- Passport and copies of its pages with photos and all visas available
- Migration card and its copy
- Registration certificate and its copy
- One 3×4 cm photo
- 1,600 RUB stamp duty payment receipt
- Copy of the enrollment contract (for fee-paying students) or the statement from the student HR department (for state-funded students)
- Current health insurance policy
- Students pursuing Master's degree must submit a copy of their preparatory course completion certificate/copy of Bachelor's diploma

MIGRATION REGISTRATION

Tatarstan has the same statutory regulations that the entire Russian Federation. For migration registration, international students have seven business days from the date of crossing the Russian Federation border, including the day of arrival, or from the date of arrival in Kazan—the arrival date is confirmed by the ticket.

Dormitory check-in

- Students checking in and living in the dormitory are registered by the university
- Students must contact the dean's office of the Faculty of International Educational Programs (FIEP) within three days after entering Russia
- You must submit your passport, migration card, current residential lease agreement, a statement from the student HR department, current health insurance policy

Registration in the apartment

- Students living in the apartment are registered by the landlord
- For this purpose, students get an application at the FIEP dean's office if they have a statement from the student HR department and health insurance policy
- With this application, statement, and student's documents, the landlord contacts the regional office of the Directorate for Migration Affairs

Students living in the hostel/hotel are registered by the hostel/hotel staff

WHAT SHOULD I DO IF...

...I lost my way in the city and did not return in time?

The university dormitories ensure 24/7 access, but students under 18 must return until 10 p.m.

...I have been invited over to another region?

You must inform the academic and international dean's offices of your departure five days before you leave Kazan. If you get registration in another region, you must get a new registration certificate on return at your place of residence.

...I have lost my documents?

You must contact the nearest police station and report the loss of your documents. Inform the university's international dean's office of your loss. After the police station gives you a statement confirming your passport loss, contact your country's embassy to get a new passport or document for returning to your country.

If you apply for your passport in Russia, the international dean's office helps you reissue your visa in your new passport.

If a new passport may be issued by your country only, you must get a transit visa by contacting the international dean's office and return home to get a new passport. After getting a new passport, you must send a scan of your passport to the international dean's office, get an invitation, apply for your visa at the Russian embassy, and come to study.

...the police have arrested me?

You must always have documents such as your passport, migration card, and registration certificate.

...I have been hospitalized for a few days?

You must inform the academic and international dean's offices of the university. After discharge, get back your hospital registration certificate and submit it to the international dean's office to get new registration at the dormitory address within three days.

If you live in the apartment, you must get a new application and get registered at your place of residence. You must do it within seven business days.

Kazan State University of Architecture and Engineering

STUDENT VISA EXTENSION

To extend their student visa, international students must submit their documents 40 days before the visa expires:

- Copies of passport and all Russian visas, migration card and registration certificate (in two copies)
- Copies of enrollment contract and dormitory accommodation agreement (in one copy)
- One 3×4 cm photo
- Also, you must pay 1,600 RUB stamp duty for visa extension

MIGRATION REGISTRATION

To get migration registration upon arrival in Russia, international students must contact the university's International Relations Department (IRD) (Room 1-49) and submit the following documents:

- **For former USSR countries**—a passport copy, checkpoint marks, migration card, enrollment contract, dormitory accommodation agreement
- **For other foreign countries**—passport copies and all Russian visas, migration card, dormitory accommodation agreement

If international students do not get migration registration, they are fined 2,000 RUB.

WHAT YOU SHOULD DO IF YOU HAVE LOST YOUR PASSPORT

- You must immediately contact the nearest police station at the place of your passport loss or detection of loss, to get a statement confirming the incident
- Inform the IRD of your passport loss (theft)
- As soon as possible, contact your country's embassy or consulate in Russia to get a new passport instead of the lost one, or a temporary travel document to leave for your country (certificate of return)
- Foreign citizens who arrived in Russia with a visa must contact the Directorate for Migration Affairs of the Ministry of Internal Affairs to get a duplicate copy of the lost (damaged) visa or to apply for a transit visa if you have to leave Russia with a temporary travel document
- Submit your new passport and visa to the Registration and Visa Department for making changes in migration registration (if they are documented by your new passport in the territory of the Russian Federation) or leave Russia (if you have obtained a temporary travel document and transit visa)

WHAT TO DO IN A DIFFICULT SITUATION

- If you lost your way in the city and did not return in time, contact the IRD staff
- If you have been invited over to another region, inform the IRD of your departure in advance, telling the exact departure date and expected return date
- If your passport, migration card, a detachable section of the notification form is damaged, lost, or stolen—immediately inform the Registration and Visa Department and take steps to have your documents reissued. If you do not, you will commit a misdemeanor
- If you have been arrested by the police, tell them that you are an international student and contact the IRD
- If you have been hospitalized, contact the IRD and tell them what hospital you are in

A movie about BSU dormitories

BSU student campus comprises four well-furnished comfortable dormitories located in different city districts.

“

Qi Qi, China. Bachelor graduate of the BSU's International Faculty with a degree in Russian as a Foreign Language

Our group had 11 Chinese students majoring in Linguistics. All of them successfully graduated, four with an honors degree, including me.

In 2020, I won the International Student of the Year at BSU annual contest, and I am still delighted with it. It's a double achievement to become the best in a country with the culture, language, mindset, and traditions different from those in China.

I am so grateful to all teachers at the BSU's International Faculty for the knowledge they gave us. All of us remember BSU and miss our student life in Irkutsk! We wish the university success and prosperity and want the teachers to be healthy and happy.

“

Ibrahima Sori Kamara, Guinea. Master graduate of the BSU's International Faculty with a degree in Theory and Methods of Teaching Russian as a Foreign Language

I came to Russia to pursue my Master's degree in Linguistics. First, I had to take a course at the preparatory faculty to learn Russian, and then I became a Master's student.

I chose Baikal State University, firstly, because it ranks high among Irkutsk universities. Secondly, the quality of university education at all levels impressed me greatly.

I am seriously considering pursuing a PhD degree, which will make me a unique top-ranked professional in my country!

“

Julia Kromp, Germany, University of Potsdam, Master's student. BSU trainee under the GoEast Scholarship program

In 2019, I came to Russia to continue my studies at Baikal State University, located in the beautiful city of Irkutsk. I chose BSU because I heard a lot of good comments about the city and university from my teachers in Germany.

I wanted to improve my Russian, so I attended a lot of various lessons during the first semester, including the Russian language practical course, introduction to linguistics, and many other disciplines. The International Faculty and BSU have a great atmosphere: all students and teachers are friendly, open-hearted, and always ready to help with anything. I am so happy that I visited Russia, Siberia and studied the Russian language and culture with native speakers.

PROMISING FIELDS OF STUDY

BACHELOR'S PROGRAM IN ARTIFICIAL INTELLIGENCE

In English

200,000 RUB
per year

Artificial intelligence is rapidly penetrating the business. There are over 300 potential uses of artificial intelligence in retail trade, finance, healthcare, production, logistics, and many other industries.

Graduates have excellent career prospects. They can hold positions of Data Scientist, machine learning engineer, artificial intelligence engineer, programmer.

Starting salary is 200,000 RUB in Moscow and three-five times higher abroad.

BACHELOR'S PROGRAM IN INTERNATIONAL BUSINESS

in English

200,000 RUB
per year

Management has been one of the most popular fields of study among international students. Many graduates find jobs in HR, project management, marketing, strategic management. Other graduates set up and successfully run their businesses.

The average starting salary of managers all over the world is 2,000 USD per month.

BACHELOR'S PROGRAM IN OIL AND GAS ENGINEERING

In Russian

133,000 RUB
per year

For many decades, the oil and gas industry has been one of the most profitable industries. Graduates can get engineering and technology jobs at all levels.

Starting salary of the Chief Engineering Officer in Russia is 150,000 RUB and three-four times higher abroad.

Artificial Intelligence

International Business

Oil and Gas Engineering

CAREER PROSPECTS

INRTU maintains close cooperation with industrial partners to provide students with internships and subsequent employment opportunities. Among its partners are major **Russian companies**: Nornickel, Rusal, Rosneft, Gazpromdobycha, Irkutskenergo, Irkutsk Oil Company, and **international companies**: Polymetal International PLC, Schlumberger, British Petroleum, Halliburton, and others.

Nornickel offers the Professional Start program that requires a fixed-term employment agreement with third-fifth-year students. Each program participant is assigned a mentor. The Nornickel management covers transport and accommodation expenses. Following the internship, students undergo certification. The project supervisors assist future specialists in selecting study materials for course papers and graduation theses.

Verkhnechonskneftegaz, Rosneft's subsidiary, offers a three-year development program for recruits. When an employee obtains the status of a young specialist, the enterprise undertakes to ensure their all-round development. Employees are assigned mentors who support them throughout the entire program, help them with adaptation and professional development.

Schlumberger offers jobs for miners, geophysicists, drillers, mechanical technicians, graduates with degrees in natural sciences in various regions and countries. Young specialists start their careers in the position of trainees. They are offered to take training courses, including English-taught courses, take an exam, and move to the next grade.

The salary will increase with every next grade. The oilfield service company covers the cost of traveling to the workplace and back, provides them with accommodation and subsidized meals. Every two years, the company compensates the personnel's expenses on traveling to any place in Russia. The enterprise is also ready to provide financial support for employees buying a residential property.

En+ Group, the top manufacturer of aluminum and renewable electric energy, provides training for INRTU students specializing in IT as part of the IT Academy program. After successful graduation, graduates will find guaranteed jobs at enterprises in En+ Group's power engineering and metallurgy segments.

Training is practice-oriented: the internship aims to solve production tasks at En+ Group enterprises and part-time employment.

“

Batgerel Minjuur, Mongolia. Master's student in Digital Technologies, Networks and Big Data

I like studying at INRTU because it offers great opportunities to gain new knowledge.

The broad range of educational modules allowed me to gain an insight into the different areas of information technology and put my knowledge into practice.

I have great fellow students from different countries, and we enjoy our time together. Our teachers take the time to explain course subjects and are very supportive to students who require extra help. I am really thankful to everyone at INRTU.

“

Zhadambaa Bat-Erdene. Minister of Road and Transportation Development of Mongolia. He graduated from INRTU in 1989 with a degree in Mechanical Engineering

Thanks to Irkutsk, my university, my teachers, and fellow students, I can proudly call myself a Siberian. Here they taught us to be honest, open-hearted, hardworking, and persistent in pursuit of our goals. I sincerely thank my teachers for their hard work. Graduates of Irkutsk universities enjoy a high reputation in any industry of Mongolia.

“

Orji Obumneme Kingsley, Nigeria

When I found out that I got accepted to INRTU, I was on cloud nine. It has been nothing less than what I had hoped for. Highly qualified and supportive teachers, beautiful campus, high-quality education, and great friends—that's what I've found here.

I've gained invaluable experience at this university. It has taught me things far beyond bookish knowledge and helped me broaden my horizons. The university offers not only various technical quizzes and contests but also many extracurricular events. There are a lot of different students on campus, which allows everyone to interact and learn from each other.

Students are encouraged to take initiatives and hone leadership skills so that they can cope with the world outside the campus. With the up-to-date laboratory facilities, various software, libraries, students can easily access study materials.

Courses are challenging but very informative. That's why we don't feel lost when entering the competitive market. All in all, INRTU offers every student exactly what they need for life. I am proud to be a student of this university!

International Mother Language Day

Practical construction classes in the laboratory room

Internship at the enterprise

VSTU is a member of several international educational associations, including the Association of European Civil Engineering Faculties (AECEF), the International Association of Civil Engineering Universities, and the Association of Russian and Azerbaijani Universities.

Professor Y.M. Borisov Research Equipment Sharing Center is a structural research unit of the university. Staff and students conduct their research in key research areas using world-class high-technology equipment.

Civil engineering master class on test equipment

CAREER PROSPECTS

The Voronezh Region is one of the most developed industrial centers of Russia. The university's cooperation with the largest regional enterprises offers international students opportunities to:

- improve their professional skills at manufacturing sites
- participate in real projects and R&D
- become professionals
- find jobs in their degree fields

Enterprises' leading specialists are:

- invited to give classes
- supervisors and advisors of graduation projects
- members of state examination boards

The university focuses on developing the competencies sought-after by top Russian and foreign high-tech companies.

VSTU graduates are successful in various areas of architecture, construction, engineering, electrical engineering, and other industries, showing themselves as creative people and good planners.

Among graduates of different years are outstanding scientists and engineers, engineering staff and senior managers of industrial enterprises, senior government officials.

The graduation employment rate is over 98 %

THE MOST POPULAR MAJORS AND FIELDS OF STUDY

- Architecture
- Civil Engineering
- Construction of Unique Buildings and Structures
- Oil and Gas Engineering
- Information Systems and Technologies
- Design
- Chemical Engineering
- Electric Power and Electrical Engineering

INTERNATIONAL EDUCATION

- English-taught Master's program in Energy Efficient Buildings
- Double degree program in Engineering Restoration of Urban Buildings and Structures with University of Genoa

VSTU administration has a strong focus on the future career of their graduates. To help them adapt to the labor market after graduation, the university annually sets up a committee for the promotion of employment of young specialists.

The Student Internship and Employment Office of VSTU's Curriculum and Instruction Department, together with the degree-granting departments, organizes meetings of prospective employers with students in each field of study (major).

INTERNATIONAL COOPERATION

- Internships for students and teachers at machine-building enterprises in the Czech Republic 🇨🇪
- Participation in the winter school at Azerbaijan University of Architecture and Construction, Azerbaijan 🇦🇷
- Online lectures for students of Daffodil International University, Bangladesh 🇬🇧
- Winter PR school held together with Sofia University, Bulgaria 🇧🇬

Partnership with 51 foreign universities and organizations from 28 countries

- University of Genoa, Italy 🇮🇹
- Technical University of Crete, Greece 🇬🇷
- Andijan State University, Uzbekistan 🇺🇿

- Participation in the volunteer movement
- WorldSkills
- Traditional celebration of Africa Day, Nowruz

PREPARATORY COURSE FOR INTERNATIONAL STUDENTS

- Russian language courses
- Assistance in adaptation
- Integration into the cultural environment
- Training in engineering and technology programs
- Advisory and methodological support

Course fee 72,000 RUB

“

Maria Lugovskaya, Moldova

When choosing a university, I was motivated by the prospects I'll have after graduation and the skills I'll acquire and be able to use in my future career. Now I am a fifth-year student and work for a construction company. I chose VSTU on my friends' recommendations.

In the beginning, it was not easy to study, but our teachers always supported us. Besides teaching a degree program, they shared the cases from their professional life, tackled practical challenges from their personal experience.

“

Phon Samnang, Cambodia

Approaches to education are quite different in my country and Russia. VSTU teachers give us a lot of theoretical knowledge and always strive to put us on the track of creativity. When I was doing my first projects for a real customer, I felt an enormous sense of responsibility, but everything worked out. Now I want to find my unique original style so that people can recognize my buildings. I like blurring the line between the old and the new. My basic principle is respect for the history of location and nature!

“

Un Phangavuth, Cambodia

Studying in Russia had been my dream since childhood when I heard the story of Gagarin, the first human in space. I studied physics and mathematics for a long time, and then I went to Voronezh.

It's not easy to study in a foreign country, that's true. But I like the way our university treats international students—teachers are always helpful. I got comfortable quickly and even found a job in my field. Now I am getting practical experience and designing buildings, but I hope to set up my company in the future.

“

Ndefoh Ebuka Anthony, Nigeria

I already have a degree in Architecture, and I also decided to get a degree in engineering at VSTU.

In the beginning, I was not sure that I would stay in Russia for long. Quite a new experience, different culture, different approaches to the construction industry. But as time went on, this became a sort of professional challenge for me. Now I can compare construction solutions of different countries and choose the best strategies in my practice. I am in love with my profession and ready to take part in projects even for free to gain new experience.

KCSU International Student Club

Student Spring of the BRICS countries in the SCO

“

Shamukhammet Pashcheyev, Turkmenistan. Student of the Faculty of Physics and Mathematics, laureate of Russian national award "Student of the Year"

Since my freshman year I've been living the student life to the fullest. I study well, write scientific articles, receive an increased academic scholarship, am socially active and have been my faculty's Head of the student self-governing body for several years. I am also a Head of a cybersports club and a member of our university's standup comedy Club of the Funny and Inventive.

Each day I discover something new. I am sure that you can achieve a lot if you want it, and I strive towards the goals I've set for myself. I have a lot of plans for future. But I am sure of one thing—everything that the Karachay-Circassian State University has given me cannot be overestimated, and I will remain grateful to my alma mater for the knowledge, experience, self-development opportunities.

“

Anna Cheatwood, USA. Undergraduate of the Karachay-Circassian State University Philology Institute

I've had interest in foreign languages since childhood, my dream was to visit Europe, to see Russia. I've entered the KCSU Master's program in the English Language mostly because I enjoy the magnificent mountains, lush nature, good climate, successfully developing tourism industry. This is great for promoting top-level tourist services where skilled interpreters are in high demand. Thanks to the support from my teachers and the university management, I have created a project called "English Vacation in the Mountains" for the students who plan to work in tourism and translating, as well as for those who try to improve their international communication skills and obtain an experience in talking to native speakers.

“

Yalkap Kasymov, Turkmenistan. Student of the Faculty of Natural Sciences and Geography and founder of Karakum dance ensemble, the winner and awardee of all-Russian and regional contests

I decided to start the Karakum ensemble when I was a freshman. I was homesick, missing our traditions and culture. While talking to other students from my country, I realized that I was not alone in my homesickness. That's how an idea was born—to create a space for young people where we can gather, share our memories of Turkmenistan, show the culture of our homeland to the locals. My idea was supported by the university management, and we decided to start a dance ensemble.

Classes in the academic and research laboratory

Classes in the crude oil distillation laboratory at the School of Petroleum and Gas Engineering

INTERNATIONAL LABORATORIES

- Bioluminescent technologies
- Biotechnology of new materials
- Central Siberian laboratory for global climate change Sib-Lab
- Genomic research
- Complex analysis and differential equations

ENGLISH-TAUGHT PROGRAMS

Master's programs

- Petroleum Chemistry and Refining
- Digital Intelligent Control Systems
- Data Science and Mathematical Modeling
- Banking
- Biological Engineering

SCHOLARSHIPS

- Two main scholarship contests organized in autumn and winter are the Open Doors Olympiad and the Russian Government Scholarship program
- The winners of the Open Doors Olympiad are eligible to get a quota for enrolling in one of the Master's or PhD programs included in the Olympiad subject areas at one of the higher education institutions of the Russian Federation
- Russian Government Scholarship program includes free tuition for the entire duration of the chosen program, maintenance allowance (for the entire duration of study regardless of the candidate's success), dormitory accommodation (if available)

SIBFU CAREER CENTER

- Advice for students, graduates, and their parents on employment and the most sought-after jobs
- Promotion of employment of SibFU graduates in their degree field and temporary employment of students during their vacation
- Job fairs, career days, individual presentations of employers, master classes, training workshops
- Development of the database of graduates, job applicants, employers, a list of job openings

CAREER OPPORTUNITIES

Bachelor's programs

Higher School of Gastronomy from INSTITUT PAUL BOCUSE

The only maximally practice-oriented educational project in Russia that provides higher education for specialists in the hospitality industry.

Tutor

Russia's first unique program that trains all-around specialists capable of working with different categories of students, from preschool children to older adults.

Master's programs

Data Science and Mathematical Modeling

Students get advanced knowledge in the field of mathematical modeling and analysis. During their learning process, they use advanced technologies and pump up their modeling and programming skills.

Banking

The program will be of particular interest to those wishing to build careers within banks, specialized financial institutions and fund management, securities dealing firms, multinational companies, or to occupy roles in corporate financial management and independent financial advice.

Digital Intelligent Control Systems

It provides training in the development of embedded intelligent control systems based on modern microprocessors, microcontrollers and programmable integrated circuits (FPGA, PLD, SoC). In the course of training, students acquire skills that allow them to perform the full cycle of developing intelligent embedded control systems at a high professional level.

Biological Engineering

The major part of the training takes place at the modern and well-equipped SibFU Laboratory of Bioluminescent Biotechnologies, led by Nobel Laureate Professor Osamu Shimomura, in one of the world's best team of scientists engaged in fundamental research of light emission by living organisms.

Petroleum Chemistry and Refining

Graduates have the opportunity to hold a position at one of the largest refineries and petrochemical plants in various companies such as Rosneft, Gazpromneft. A highly qualified team from SibFU, specialists from refining enterprises, and international business trainers help students acquire the necessary professional skills and competencies for further development in the petroleum industry.

Graduates can obtain a position in both public and private sectors, continue studying to earn a PhD SibFU degree

SibFU trains highly qualified specialists that meet modern intellectual requirements and international standards and are competitive in the international job market. Graduates are capable of working in any region of the Russian Federation, in the harsh conditions of the north in particular.

PARTNERS

The SibFU campus—a city in the city—
 24 academic buildings and 30 dormitories
 Language centers, a museum, the UNESCO

SibFU women's football team

“

Manuel Gomez Peinado, Spain

I have a long relationship with Siberian Federal University: I came here for an exchange semester once and realized that I had a heart for it. There is a Spanish Language Center at the university, where they help us in everything: from paperwork to solving everyday problems. I feel very good here: the SibFU campus is my favorite place in Krasnoyarsk. In my free time, I like going to a swimming pool and walking in the nearby woods.

*I have been studying Russian for five years now. At first, many concepts were difficult to understand, for example, those related to student life. I didn't understand what *zacet*, *zacetnaya knizhka*, *poluchit' avtomat* means, but live communication is the best way to fill in the gaps. Every day I learn new words, write down expressions that I hear in the street, and am amazed at how differently a thought can be put in Russian.*

Now I am finishing my Master's degree and want to stay in Russia—not in Moscow spoiled by tourists, but here, in calm Krasnoyarsk, and work as a teacher at SibFU.

“

Sebastian Sativa, Colombia

At the age of twenty, I realized that I wanted to completely change my life: move to some other country, get an education abroad, learn more about some other culture. I chose Russia and Siberia not by chance, I wanted to come to Krasnoyarsk and enter Siberian Federal University. Foreigners usually associate Russia with cold weather and bears. Yes, it's cold here, but nature is so beautiful! I think this country should be visited by tourists more.

Initially, Russia got me interested in its history and culture, but it was the good people who made me fall in love with this country. Before coming to Krasnoyarsk, I studied Russian culture and traditions, conducted a kind of research to find out what kind of nation the Russians are. Yes, they are serious, but this is quite okay—in such weather, few people manage to smile all the time. Nevertheless, I found myself in a friendly student environment, and teachers, fellow students and just passers-by are always willing to help. I made great friends here.

It turned out that the program I chose was not taught in English, so I study in Russian. However, there is no language barrier: the teachers speak clearly and understand that I am the only foreigner in the group. Russian is a beautiful and difficult language, and Russia is a huge country, and you need to learn to speak Russian if you decide to come here.

Derzhavin Tambov State University

“

Fillemon Shikomba, Namibia. He works as a legal counsel for the United Nations Organization (New York, USA)

I graduated from Derzhavin TSU in 2016 with a degree in Law. Thanks to my highly proficient teachers, I was ready for self-improvement and further professional development right from the start.

Since then, I've been moving forward and progressing. Thanks to my Russian education, I was able to continue my studies in the USA. I work at the UN headquarters and am involved in reforming global policy in water resources and human rights.

“

Ines Dhif, Tunisia

Derzhavin TSU was the first stage of my studies. It's here that I got my first medical knowledge pursuing a degree in General Medicine. Here I started studying Russian, which is of help to me in my career now. I am a first-year PhD student in Cardiology at I.M. Sechenov First Moscow State Medical University. I can freely communicate with my patients and colleagues in Russian. I have a lot of Russian friends who have become my second family.

“

Ping U, Professor, Dean of the Faculty of Russian Language of Hainan University, China

Derzhavin TSU has played a pivotal role in my professional career. I pursued my PhD degree here and defended my thesis in 2003.

Studying at Derzhavin TSU not only broadened my career horizons. It also let me immerse myself in the multicultural learning environment. This experience was of the utmost importance. I experienced scientific and creative enrichment by studying the Russian language, society, science.

Today I am Dean of the Faculty of Russian Language of Hainan University, one of the top Chinese universities, and strongly support TSU's cooperation with Hainan University in education and culture. To my mind, Derzhavin University deserves credit for offering its students excellent opportunities for professional development and personal enhancement, acquisition of cross-cultural communication skills based on mutual understanding and mutual respect between representatives of different countries and peoples.

International BOOM

Cuisines of the World contest

“

**Ahmadi Ali Reiza,
Afghanistan. School
of Economics and
Management**

Choosing a university, I visited many Russian cities and decided on PNU in Khabarovsk. I was the only student from Afghanistan here, and this motivated me to get acquainted with guys from other countries.

During the first year, I studied Russian because I didn't speak it at all. I didn't even know how to greet people. Now I can easily go to the city center and communicate effectively.

Now we are studying mathematics, economic theory, philosophy, but somehow we are not studying computer science, which I will need in my future profession. That's why I read and study a lot by myself.

“

**Marc, South Korea.
Faculty of Philology,
Interpreting and
Translation Studies and Cross-Cultural
Communication**

After the army (many young people in Korea serve in the army after the first or second year of study), I seriously considered studying Russian and found a student exchange program. I chose PNU from several universities.

I knew nothing about Khabarovsk, only that it has the Amur River. And, to be honest, I was afraid of racial discrimination.

I like living and studying in Khabarovsk. Local people are really helpful.

“

Xavier Francois Habinshuti, Rwanda

In my native country, I worked as a computer technology teacher at a polytechnic college. I got an offer to take part in a PhD scholarship program. I applied for it, and Pacific National University chose me.

In the beginning, I took a preparatory course in an engineering group. I studied Russian, speech styles, mathematics, physics, and Russian geography. Russian was the most difficult subject.

In Rwanda, we know little about Russia, only that it is a country with super technology, which ranks among the top five best countries in the world. When I was coming to Russia, I wasn't worried. I read about the country and knew that the police work well here. And if you come legally, everyone will be happy to see you.

The education system in Russia is more developed than that in Rwanda, as it exists for a longer time. Teachers have more opportunities for enhancement in Russia. There are libraries and laboratories. That's great.

Alexander
Pushkin

RUSSIAN AS FOREIGN LANGUAGE

Russian is the language of Pushkin, Tolstoy, Dostoevsky and many other writers that are so popular around the world. Learning Russian will help you easily integrate into the learning process, find new friends, discover the vast world of Russian culture, grow professionally.

The KNRTU, KSUAE and Bauman Kazan State Academy of Veterinary Medicine staff members explain the issues international students face while studying Russian and give useful advice for further learning.

GREETING AND ADAPTING

After arriving in Russia, the first issues the students face are the language-related ones, stemming from lack or poor command of the Russian language. The senior students from the same countries take care of them and help them to settle down before the beginning of the classes.

Then the Dean's office of the Faculty of International Educational Programs provides all kinds of support to foreigners on any issues. The students are welcome to call or see the Dean's office staff in person about their studying, accommodation, paperwork, further education at university programs, medical service or city transportation.

NATIONAL TRAITS

The Russian language is hard to learn indeed. International students experience difficulties when dealing with such parameters as variability, synonymy, antonymy, paronymy, different vocabulary depending on the speech functional style, official/unofficial speech. Still, despite all hurdles, foreigners can get pretty good at Russian.

Speaking from the experience, English-speaking students, such as those from the US, Indonesia, Rwanda or Nigeria, master the Russian language remarkably faster and more effectively, making few mistakes. The students from Arabic countries have the hardest time learning Russian. They often make vowel pronunciation mistakes. For example, "futbul" instead of "futbol", "no" instead of "nu", "roka" instead of "ruka", "zhivot" instead of "zhivot". Same problem with consonants: "brebodavatel" instead of "prepodavatel", "Sheshnya" instead of "Chechnya".

As for Vietnamese students, they experience issues at every level of the language system—phonetics, phonology, syntax, morphology and vocabulary—because of the differences between Russian and Vietnamese languages.

STUDYING DIFFICULTIES

Most often foreigners experience the following issues when studying the Russian language:

- The alphabet, namely the pronunciation of the Ж, Ш, Щ, Ч, Ъ consonants
- Pronunciation and correct usage of the vowels (especially with Arabic-speaking students)
- Adapting to the teacher's voice, not being able to understand native Russian speakers at first
- The "soft and hard signs", pronunciation of "y" in "ty, vy, my"
- Incorrect translation via Yandex. Translate which loses the meaning of a phrase or a lexeme
- Grammar, especially the system of cases of the Russian language
- Motion verbs with prefixes such as "voyti-viyti", "oboyti", "pereyti", "zayti", "priyti-uyiti", etc.
- Difficulties in reading Russian capital letters
- The negative influence of the native language hinders the correct perception of the Russian language case system (na skolko vremeni, za skolko vremeni, skolko vremeni, cherez skolko vremeni), especially for Chinese students

The first year of study is usually the most complicated. The learning process is in Russian, the study of general scientific disciplines is carried out alongside the mastery of the Russian language.

WAYS TO OVERCOME. OUR TIPS

- Daily diligent study of the Russian language
- Various Russian-as-a-foreign-language learning programs, audio CDs
- Online platforms: Moodle, Microsoft Teams
- Interim testing that allows to detect and systemize the mistakes, proficiency testing
- Using illustrated learning materials
- Doing practical exercises on various topics, regular phonetic training during the classes and self-learning
- Speech practice
- Constant revisiting of the learned material

LEARNING THE LANGUAGE

At the Russian language classes we use poems by famous poets, such as Sergey Yesenin's *White Birch*, Eduard Asadov's *What is Happiness?*, Alexander Pushkin's *Winter Morning*, Ivan Krylov's fables, proverbs, sayings, phraseological constructions, songs, movies and cartoons.

We recommend to you the textbooks by E.N. Bogatova—"Russian as a Foreign Language: Basic and Beginner's Level" (2020), "Russian as a Foreign Language: Elementary Level" (2018).

Every Russian class turns out to be quite interesting, as each student is unique and can produce "masterpieces" such as: "My mom is a teacher from Russian language", "If I do not pay my money for college I will be unemployed", "The merchant told me that...", "He will not hear at me...", "We are now from the secretary", "Why do they fry me from the group?", "Thank you for your worry with us". Once, a student said: "Russian language is mathematics".

UNIVERSITY EVENTS

KNRTU offers certification Russian language testing for foreign nationals: elementary level, basic level, first level, as well as testing for acquiring Russian citizenship and a complex exam in "The Russian Language" module. The university organizes a photography contest "My Land is My Home", a student poetry and essay contest "My Native Language is My Treasure".

For the last decade, the faculty of International Educational Programs has been organizing an all-Russian contest in Russian as a foreign language "The Russian Language: the Start in Your Profession" that international students from various universities participate in.

The university offers international students a wide choice of day trips and sightseeing programs such as visiting museums, theatres, the ancient town of Bolgar, the isle town of Sviyazhsk and other cultural landmarks of Kazan.

Kazan State University of Architecture and Engineering

The courses of Russian as a foreign language are attended by multinational student groups up to 16 persons. Algeria, Egypt, Turkey, Uzbekistan, Turkmenistan, Syria, Tunisia, Columbia—these are the countries whose citizens have attended the Russian language course at KSUAE.

It is obvious that, being a part of the Indo-European language group, Russian is easier for those foreigners who are familiar with the Latin characters and harder for those who are not experienced in graphics and phonetics of European languages (Chinese, Arabic, Hindi native speakers). In these cases we use special graphic and phonetic exercises.

The second important aspect in language learning is motivation. A special nod to those students who have already got their bachelor's degree and would like to receive further education in a professional sphere.

Learning the language in the country where it is spoken has incredible advantages, since it

implies the immersion not only in the linguistic environment but also in the culture and life of the strange, not yet familiar country.

The course of Russian as a foreign language should not only teach the grammar of the language but also tell about the country's traditions, customs and holidays (such as Shrovetide, Easter, Christmas), the cultural monuments (the Hermitage, Bolshoi Theatre, Söyembikä Tower), historical personalities (Peter I, Ivan the Terrible, Catherine the Great), poets, composers, writers (Tchaikovsky, Pushkin, Tukay).

Most likely, such information would only be mentioned at the classes. However, those who discover in themselves a real interest in history, culture and art eventually travel across Russia on their own, visiting museums and theatres. This speaks volumes about foreigners' interest towards our country, the Russian language and history.

The great and powerful Russian language! Admittedly, not the easiest for a foreigner. But the example of many students who have passed the Russian language course at KSAVM Pre-University Training Center for Foreign Nationals with flying colors inspires many more to come to our country and study this complicated language.

It can be baffling and often incomprehensible. **The cases** are the stumbling block for any foreigner. If you manage to master them it will get much easier from there on. **The word order in a sentence** can also mess with a foreigner's head. It can be completely random, depending on what we want to say. Apart from the proper order, the words are stressed with the help of intonation.

The highly skilled, experienced teachers of the Center will help you to grasp all of the above. We consider it important to introduce the foreign students who study Russian to the Russian culture, traditions, literature, rituals and customs, because such knowledge is the crucial point of successful

adapting to the Russian-speaking environment. The Center is open to foreign nationals who would like to continue their education in the Russian language as students, undergraduates, postgraduates at the academy as well as other Russian universities.

The study groups consist of 10 persons each. At the classes, foreigner-targeted textbooks, learning materials and hi-tech equipment in all the rooms are provided.

Dormitories are available to students. The rent costs separately. The pre-university courses are contract-based. The tuition fee is 78,000 RUB as for 2021. Those who graduate with good grades and successfully pass the exam in Russian as a foreign language receive the First Level Certificate.

We are proud to announce that over 600 students have graduated from our course in such a short period of time. Their geography is extensive—Great Britain, Algeria, Turkey, Macedonia, Egypt, Morocco, Côte d'Ivoire, Cameroon, Burundi.
